Please follow this measuring method:

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

Seat width (SW):

- a) *For the user:* Allow space between sideguard and hip on each side of the chair (approx. 10 - 20 mm altogether)
- b) *On the wheelchair:* From outside frame tube to outside frame tube.

Seat depth (SD):

- a) *For the user:* When sitting upright: leave space for 2 - 3 fingers between front edge of the seat upholstery and back of knee (approx. 30 - 60 mm). Care must be taken with adj. upholstery.
- b) *On the wheelchair:* From back tube to front of seat upholstery.

Front seat height:

- a) *For the user:* When sitting with 90° kneeangle:
From back of knee to bottom of shoe sole.
- b) *On the wheelchair:* From front of seat tube to the ground .
(min. 30 mm longer than user measurement)
Remember to include the cushion height.

Rear seat height:

- b) *On the wheelchair:* From back of seat tube to the ground.
Note: Max. seat height difference rear to front is 130 mm

Back height:

- a) *For the user:* From the seat, including cushion, to be no more than 10 - 20 mm
- b) *On the wheelchair:* From back of seat tube to upper edge of backrest upholstery.
Note: The user's ability to sit upright has a major influence on the back height and it can therefore differ considerably

Back angle:

Important: The back height depends on the degree of disability.
0° is the angle 90° to the ground. Negative angles are < 90°
and positive angles are > 90°.

Technical Data Overview:

Max. overall height:	1125 mm		
Max. overall length:	1190 mm		
Max. turning circle:	960 mm		
Max. safe slope:	10°		
Wheelchair weight:	from 14,5 kg		
Dismantled weight:	from 8 kg		
Weight of heaviest part:	2,1 kg
