**Please follow measuring method:**

The following method is recommended on the basis of extensive practical experience.

Deviations are possible in individual instances

**Seat width:**

**a) For the user:**

Allow space of sideguard to pass vertically between hip and sideguard on each side (approx. 10 - 20 mm altogether)

**b) On the wheelchair:**

From outside frame tube to outside frame tube

**Seat depth:**

**a) For the user:**

When sitting upright: leave space for 2-3 fingers between front edge of seat upholstery and back of knee (approx. 30 - 60 mm). Care must be taken with adjustable upholstery

**b) On the wheelchair:**

From back tube to front of seat upholstery

**Back height:**

**a) For the user:**

Measured from the seat, including cushion, to **no more** than one finger (10 - 20 mm) below the lower shoulderblade.

**Important!** The back height depends on the degree of disability

**b) On the wheelchair:**

From seat tube to upper edge of backrest upholstery.

**Note:** The user's ability to sit upright has a major influence on the back height and it can therefore differ considerably

**Lower leg length:**

**a) For the user:**

With legs angled at right angles, from back of knee to bottom of shoe sole

**b) On the wheelchair:**

From front of seat to top of footrest.

**Remember:** to include the cushion height

**Overall width:**

|             |        |
|-------------|--------|
| Max. Width  | 700 mm |
| Max. Height | 920 mm |
| Max. Length | 930 mm |

**Weights:**

Minimum weight: from 8.5 kg

**Folded size:**

Minimum width: ca. 310 mm

**NOTES:**

Max. seat height difference rear to front is 120 mm

No negative seat angle is possible

Manufacturing tolerances of +/- 10 mm

Product is crash tested according to ISO 7176-19 and therefore approved for transportation in a vehicle.

For transport without a user the chair must be safely clamped in the vehicle.
